

VISHNU S

Age	20 years old
Location	Erode, Tamil Nadu
Occupation	Student & Athlete
Income Level	Dependent on Family

BACKGROUND

- Vishnu is a college student who actively participates in sports and spends several hours every week in training and competitions.
- He follows a physically active lifestyle and regularly consumes fruits, vegetables and other fresh foods.
- He uses his smartphone frequently and prefers convenient online services that save time.

GOALS

- Vishnu wants to maintain a healthy diet by getting fresh fruits and vegetables regularly.
- He wants to purchase quality farm products at affordable prices within his student budget.
- He wants to support local farmers while getting fresh produce conveniently.

PAIN POINTS

- His training and college schedule makes it difficult to visit local markets regularly.
- He has a limited budget and wants better prices without compromising freshness.
- He finds it difficult to identify trusted farmers who sell directly to customers.

NEEDS

- An affordable and simple platform for ordering fresh produce directly from farmers.
- Convenient delivery and digital payment options that fit his college and training schedule.

PRIYA S

Age	36 years old
Location	Anna Nagar, Chennai
Occupation	Homemaker
Income Level	300000 PA

BACKGROUND

- Priya manages her household and regularly purchases vegetables and fruits for her family's daily needs.
- She usually buys produce from nearby shops and supermarkets without knowing the actual source or the farmer behind it.
- She is interested in buying directly from farmers to get fresher products at reasonable, transparent prices.

GOALS

- Priya wants to purchase fresh vegetables and fruits for her family at affordable, fair prices.
- She wants to know exactly where the products come from before making a purchase decision.
- She wants a convenient way to order farm products regularly without visiting multiple shops.

PAIN POINTS

- She cannot always determine how fresh the vegetables actually are at local shops.
- She feels that product prices increase unnecessarily because of multiple intermediaries.
- Finding reliable farmers who sell directly to consumers near her area is difficult.

NEEDS

- Clear information about product prices, freshness, farmer details and delivery timelines.
- A simple ordering system with convenient payment options and reliable, timely delivery.

RAJKUMAR

Age	38 years old
Location	Erode, Tamil Nadu
Occupation	Kabaddi Coach
Income Level	420000 PA

BACKGROUND

- Rajkumar works as a Kabaddi coach in Erode and spends most of his time training young players.
- He maintains an active lifestyle and regularly purchases fresh fruits and vegetables for himself and his trainees.
- He prefers buying fresh local produce and is interested in supporting farmers from nearby areas.

GOALS

- Rajkumar wants to provide fresh and nutritious food for himself and the players he trains.
- He wants to purchase farm products at reasonable prices without unnecessary middlemen.
- He wants a convenient way to order fresh produce from trusted local farmers.

PAIN POINTS

- Finding consistently fresh fruits and vegetables at reasonable prices can be difficult.
- He has limited time to visit different markets because of his coaching schedule.
- He does not always know whether the products available in shops come directly from local farmers.

NEEDS

- A convenient platform to find fresh produce directly from nearby farmers.
- Reliable pricing, ordering and delivery options that fit his busy coaching schedule.

KARTHIK R

Age	27 years old
Location	Sulur, Coimbatore
Occupation	Organic Farmer
Income Level	180000 PA

BACKGROUND

- Karthik belongs to a farming family and started managing his family's farm after completing his education.
- He is interested in modern farming techniques and uses smartphones and social media to promote his products.
- He currently sells through local markets and traders but wants to reach customers directly.

GOALS

- Karthik wants to build a direct customer base for his organic vegetables.
- He wants to increase his farm income by reducing dependency on middlemen and unnecessary commissions.
- He wants to create a recognizable identity for his farm and its products.

PAIN POINTS

- He finds it difficult to reach enough customers outside his local area.
- Managing customer enquiries, orders and payments through different platforms is inconvenient.
- He spends additional time promoting his products without knowing whether it will result in actual sales.

Needs

- A digital marketplace where he can showcase his farm, products, prices and availability.
- Tools for managing customer orders, payments and direct communication in one platform.

VEL MURUGAN V

Age	34years old
Location	thindal road ,erode
Occupation	farmer
Income Level	12000PA

BACKGROUND

- Murugan comes from a farming family and has been cultivating vegetables for more than 20 years.
- He owns a small piece of agricultural land and mainly depends on farming as his family's source of income. He usually sells his harvest to local traders, who determine the price.
- He is interested in direct selling but has limited experience with digital platforms.

GOALS

- Murugan wants to sell his vegetables directly to customers instead of depending on local middlemen.
- He wants to receive a fair price for his hard work and reduce unnecessary commissions.
- He also wants a stable group of regular customers who purchase his produce.

PAIN POINTS

- He usually depends on middlemen to sell his harvest, which reduces his profit.
- He has limited knowledge about current market prices and sometimes has unsold vegetables.
- He also finds it difficult to reach customers directly.

NEEDS

- A simple platform to list his farm products, update prices and quantities, and receive customer orders directly.
- A reliable payment and communication system that helps him sell without depending on middlemen.

ARUN K

Age	21 years old
Location	Kanyakumari, Tamil Nadu
Occupation	College Student
Income Level	Dependent on Family

BACKGROUND

- Arun is a college student living in Kanyakumari and focuses mainly on his studies and college activities.
- He usually depends on his family for groceries and daily household requirements.
- He is comfortable using smartphones and online platforms and prefers convenient ways to purchase fresh products.

GOALS

- Arun wants to get fresh fruits and vegetables at reasonable prices without spending too much time shopping.
- He wants to support local farmers by purchasing their products directly whenever possible.
- He wants a simple online platform that allows him to compare products and prices before ordering.

PAIN POINTS

- He has limited personal income and is conscious about the price of products.
- He may not have enough time to visit local markets because of college classes and activities.
- He finds it difficult to identify farmers who sell their produce directly to customers.

NEEDS

- An affordable and easy-to-use platform for finding and ordering fresh farm products.
- Convenient digital payment and delivery options suitable for a college student's schedule.

RAMESH K

Age	42 years old
Location	Erode, Tamil Nadu
Occupation	Grocery Shop Owner
Income Level	₹6,00,000 PA

BACKGROUND

- Ramesh owns a grocery and vegetable shop and purchases vegetables in bulk every morning.
- He currently buys most products through wholesalers and local vegetable markets.
- He needs a continuous supply of fresh products because customers expect good quality every day.

GOALS

- Ramesh wants to purchase vegetables directly from farmers at competitive wholesale prices.
- He wants to compare prices, quantity and availability from multiple farmers.
- He wants to reduce dependency on wholesalers and increase his shop's profit margin.
- He wants to place bulk orders in advance to maintain sufficient stock.

PAIN POINTS

- Wholesale prices change frequently and multiple intermediaries increase costs.
- He has limited information about the actual source and freshness of products.
- Required quantities may be unavailable when he reaches the market.

NEEDS

- Bulk ordering with quantity-based pricing and live tock information.
- Reliable delivery, order tracking, digital invoices and payments.

SURESH M

Age	39 years old
Location	Coimbatore, Tamil Nadu
Occupation	Restaurant Owner
Income Level	₹9,00,000 PA

BACKGROUND

- Suresh operates a restaurant that requires fresh vegetables and fruits every Day
- He currently purchases ingredients through local suppliers and wholesale markets.
- Freshness and consistent availability directly affect his restaurant operations.

GOALS

- Get a regular supply of fresh products directly from trusted farmers.
- Reduce ingredient costs without compromising product quality.
- Schedule recurring orders based on daily and weekly requirements.

PAIN POINTS

- Product quality can vary between suppliers and sudden shortages affect operations.
- Comparing prices from different suppliers takes additional time.

NEEDS

- Scheduled and recurring bulk orders with clear availability information.
- Secure payments, invoices and dependable delivery.
